

Contents

Preface	v
Acknowledgements	vii
1. Historical Review of Microbiology	1
1.1 Discovery of Microorganisms	1
1.2 Doctrine of Spontaneous Generation	4
1.3 Germ Theory of Disease	7
1.4 Establishing Control of Microbial Infections	11
1.5 Microbial Transformation of Organic and Inorganic Matter	15
1.6 Diversity of Microorganisms	16
1.7 Place of Microorganisms in the Living World	17
2. Development and Scope of Microbiology	24
2.1 Major Fields of Microbiology	24
2.2 Microbial Model Systems of Choice	29
2.3 Recombinant DNA Technology in Applied Microbiology	30
2.4 Nucleic Acid Probe Technology and Identification of Microbes	31
2.5 Polymerase Chain Reaction (Pcr) in Molecular Microbiology	32
2.6 Emerging Problems of Biological Warfare and Bioterrorism	32
2.7 Microbiology in India	33
3. Microscopy, Staining and Micrometry	40
3.1 History and Principles of Microscopy	40
3.2 Bright – Field Microscopy	43
3.3 Fixing and Staining of Microbes for Light Microscopy	46
3.4 Micrometry	53
3.5 Dark – Field Microscopy	54
3.6 Fluorescence Microscopy	55
3.7 Confocal Microscopy	57
3.8 Phase – Contrast Microscopy	58
3.9 Differential Interference Contrast Microscopy (DIC)	60
3.10 Transmission Electron Microscopy (TEM)	61
3.11 Preparation of Specimens for Transmission Electron Microscopy (TEM)	63
3.12 Scanning Electron Microscopy (SEM)	64

3.13 Scanning Tunneling Microscopy (STM)	66
3.14 Atomic Force Microscopy (AFM)	67
3.15 Scanning Acoustic Microscopy (SAM)	67
4. Nutrition and Growth of Microorganisms	71
4.1 Nutritional Requirements	76
4.2 Nutritional Types of Microorganisms	78
4.3 Uptake of Nutrients by the Microbial Cell	30
4.4 Environmental Factors Influencing Growth	82
4.5 Microbial Growth and Measurement	90
5. Culturing, Maintenance and Disposal of Microorganisms	98
5.1 Techniques of Pure Culture Isolation	98
5.2 Culture Media and Types	102
5.3 Preparation and Sterilization of Culture Media	107
5.4 Cultivation of Microbial Cells	108
5.5 Maintenance of Pure Stock Cultures	111
5.6 Culture Collection Centres and Their Functions	116
5.7 Handling, Disposal of Microbes and Biosafety	117
6. The Prokaryotes-Cell Structure, Function and Reproduction	123
6.1 General Features of Prokaryotic Cell	123
6.2 Variations in Bacterial Size, Shape and Arrangement	124
6.3 Structures External to the Bacterial Cell Wall	126
6.4 The Bacterial Cell Wall	134
6.5 The Plasma (Cytoplasmic) Membrane	139
6.6 Cytoplasm and Cytoplasmic Inclusions	142
6.7 Bacterial Spores and Cysts	146
6.8 Reproduction in Prokaryotes	150
7. The Prokaryotes-Diversity, Taxonomy and Biological Importance	155
7.1 Taxonomic Ranks of Prokaryotes	155
7.2 Code of Nomenclature	156
7.3 Characteristics used in Classification and Identification	158
7.4 Classification Schemes of Prokaryotes	161
7.5 Diversity and Biological Importance of Archaea (Archaeobacteria)	163
7.6 Diversity and Biological Importance of Bacteria (Eubacteria)	172
7.7 Prokaryotic Culture Collections	200

8. The Eukaryotes-Cell Structure, Diversity and Biological Importance	205
8.1 The Fungi	204
8.2 The Fungus – Like Organisms	219
8.3 The Algae	224
8.4 The Protozoa	232
9. The Viruses - Discovery and Characteristic Features	242
9.1 Discovery of Viruses	242
9.2 Evolutionary Origin of Viruses	244
9.3 Distinguishing Characteristics of Viruses	245
9.4 Structure of Viruses	246
9.5 Nomenclature and General Classification of Viruses	250
10. The Animal Viruses	256
10.1 Classification of Animal Viruses	257
10.2 Types of Viral Infections in The Host	262
10.3 Multiplication of Animal Viruses	263
10.4 Animal Viruses and Tumourigenesis	278
10.5 Animal Viruses and Teratogenesis	281
10.6 Detection of Animal Viruses in The Host	282
10.7 Isolation, Purification and Assay	284
10.8 Cultivation of Animal Viruses	285
10.9 Transmission of Viral Infection	287
10.10 Strategies for Preventing Viral Infection	289
11. The Plant Viruses	297
11.1 Classification of Plant Viruses	297
11.2 Structural Characteristics of Plant Viruses	307
11.3 Symptoms of Virus Infection in Plants	309
11.4 Histological Changes Induced by Viruses	312
11.5 Cytopathological Effects of Virus Infection	313
11.6 Physiology of Virus-Infected Plants	314
11.7 Translocation and Distribution of Viruses in Plants	315
11.8 Methods for Cultivation of Plant Viruses	317
11.9 Detection and Diagnosis of Viral Diseases	317
11.10 Isolation, Purification and Quantitative Assay	320
11.11 Infection and Replication	327
11.12 Transmission of Plant Viruses	332

11.13 Control of Plant Viruses	335
11.14 Economic Importance of Viruses with Emphasis on Common Viral Diseases of Plants	342
12. The Bacteriophages, Cyanophages and Mycophages	350
12.1 Discovery and Significance of Bacteriophages	350
12.2 Classification of Bacteriophages	351
12.3 Structural Characteristics of Bacteriophages	354
12.4 Isolation, Cultivation, Storage and Enumeration of Bacteriophage Numbers	356
12.5 Kinetics of Bacteriophage Multiplication	358
12.6 Replication of Virulent (DNA) Bacteriophages	359
12.7 Replication of Temperate (DNA) Bacteriophages	364
12.8 Replication of Filamentous (DNA) Bacteriophages	368
12.9 Replication of RNA Bacteriophages	369
12.10 Cyanophages	370
12.11 Mycophages	371
13. Virus - Like Infectious Agents (Viriods and Prions)	374
13.1 Discovery and Significance of Viriods	374
13.2 Nomenclature and Classification of Viroids	374
13.3 Structure and Replication of Viroids	375
13.4 Pathology of Viroids	377
13.5 Diagnostic Tests for Viroid Detection	378
13.6 Discovery and Characteristics of Prions	379
13.7 Diseases Caused by Prions	382
13.8 Disinfection of Prion-Contaminated Materials	383
14. Essential Concepts of Microbial Metabolism	386
14.1 An Overview of Metabolism	386
14.2 Major Biological Molecules	388
14.3 Enzymes in Metabolism	393
14.4 Principles of Bioenergetics	398
14.5 Energy Production	400
14.6 Catabolism of Carbohydrates	403
14.7 Catabolism of Intracellular Reserve Polymers	421
14.8 Catabolism of Lipids	421
14.9 Catabolism of Proteins and Amino Acids	422
14.10 Oxidation of Inorganic Molecules	423
14.11 Energy Production by Photosynthesis	425
14.12 Utilization of Energy	429

15. An Overview of Microbial Genetics	439
15.1 Nature of Hereditary Information	439
15.2 DNA Replication	441
15.3 Rna and Protein Synthesis	443
15.4 Extrachromosomal DNA (Plasmids)	450
15.5 Transposable Genetic Elements	454
15.6 Mutations	456
15.7 Genetic Transfer and Recombination	462
15.8 Recombinant DNA Technology	470
16. Microbial Ecology	478
16.1 Microorganisms in Natural Environments	478
16.2 Microbiology of Terrestrial Environment	479
16.3 Biogeochemical Cycles	482
16.4 Microbiology of Freshwater Environments	488
16.5 Microbiology of Marine Environments	491
16.6 Microbiology of Extreme Environments	493
16.7 Surfaces and Biofilms	495
16.8 Aeromicrobiology	496
17. Microbial Interactions	500
17.1 Functions of Symbiotic Relationships	500
17.2 Establishment of Symbiosis	501
17.3 Types of Symbiosis	502
17.4 Commensalism	503
17.5 Synergism	504
17.6 Mutualism	505
17.7 Parasitism	520
18. Viral Diseases of Humans	529
18.1 Airborne Viral Diseases	529
18.2 Food and Waterborne Viral Diseases	534
18.3 Vector Transmitted Viral Diseases	537
18.4 Sexually Transmitted Viral Diseases	539
18.5 Direct Contact Viral Diseases	541
18.6 Emerging and Resurgent Viral Diseases	544

19. Bacterial Diseases of Humans	550
19.1 Airborne Diseases of the Upper Respiratory Tract	550
19.2 Airborne Diseases of the Lower Respiratory Tract	551
19.3 Food- and Water-Borne Bacterial Intoxications	556
19.4 Food and Water-Borne Bacterial Diseases	557
19.5 Soil-Borne Bacterial Diseases	561
19.6 Arthropod - Transmitted Diseases	563
19.7 Sexually Transmitted Diseases	566
19.8 Direct Contact Diseases	567
19.9 Nosocomial Infections	568
19.10 Emerging Bacterial Diseases	569
20. Fungal Diseases of Humans	574
20.1 Superficial Mycoses	574
20.2 Cutaneous Mycoses	576
20.3 Subcutaneous Mycoses	578
20.4 Systemic Mycoses	579
20.5 Opportunistic Mycoses	582
20.6 Fungal Toxicoses	585
21. Protozoan Diseases of Humans	593
21.1 Protozoan Diseases of the Gastrointestinal Tract	594
21.2 Protozoan Diseases of the Cardiovascular and Lymphatic Systems	596
21.3 Protozoan Diseases of the Nervous System	600
22. Sterilization and Disinfection	604
22.1 Practice of Sterilization and Disinfection	604
22.2 Factors Influencing Antimicrobial Action	606
22.3 Mechanisms of Action of Antimicrobial Agents	607
22.4 Physical Methods of Microbial Control	608
22.5 Chemical Methods of Microbial Control	617
23. Antimicrobial Chemotherapy	628
23.1 Historical Development of Chemotherapy	628
23.2 Characteristics of Antimicrobial Drugs	631
23.3 Action of Antimicrobial Drugs	632
23.4 Antibacterial Drugs	634
23.5 Antifungal Drugs	642
23.6 Antiviral Drugs	643

23.7 Anti-Protozoan Drugs	645
23.8 Anti-Helminthic Drugs	646
23.9 Microbial Resistance to Drugs	646
23.10 Mechanisms of Drug Resistance	648
23.11 Microbial Susceptibility to Chemotherapeutic Drugs	649
23.12 Future of Antimicrobial Agents	651
24. Resistance and the Immune System	656
24.1 The Innate Resistance (Nonspecific Defences)	656
24.2 The Acquired Resistance (Specific Defence Immunity)	666
24.3 Cells and Tissues of the Immune System	667
24.4 General Characteristics of Immune Responses	669
24.5 Antibody – Mediated Immunity	670
24.6 Cell-Mediated Immunity	676
24.7 Vaccination	680
24.8 Serological Reactions and Serodiagnosis	683
24.9 Hypersensitivity Reactions	688
24.10 Autoimmune Disorders	695
24.11 Immune Deficiencies	697
25. Environmental Microbiology	702
25.1 Microbial Bioremediation of Polluted Environments	702
25.2 Composting of Biodegradable Organic Matter	707
25.3 Bioremediation	708
25.4 Indicator Microorganisms in Polluted Waters	713
25.5 Purification and Testing of Drinking Water	713
25.6 Domestic Wastewater (Sewage) Treatment	715
26. Industrial Microbiology and Biotechnology	720
26.1 Fermentation Technology	720
26.2 Microbial Sources of Traditional Fermented Beverages	722
26.3 Fermented Food Products	724
26.4 Commercial Production of Baker's Yeast	727
26.5 Fermented Dairy Products	728
26.6 Microbial Health Foods	729
26.7 Microbial Sources of Animal Feeds	731
26.8 Microbial Production of Pharmaceuticals	731
26.9 Microbial Production of Amino Acids and other Organic Acids	736

26.10 Microbial Production of Enzymes	741
26.11 Microbial Production of Solvents	745
26.12 Microbial Production of Fuels	745
26.13 Biopesticides	746
26.14 Biopolymers	746
26.15 Biosurfactants	748
26.16 Biosensors and Biochips	748
26.17 Products Derived From Genetically Engineered Microorganisms	749
References	754
Appendix A	760
Appendix B	778
Appendix C	791
Glossary	793
Subject Index	891
Organism and Taxa Index	924
